What's New?

User Guide

- A [Quickstart](#) page is now available for first-time readers.
- In the Expert Mode of instance launch, the assignment of a keypair is no longer mandatory.
- In the Cockpit settings, you can now set a default keypair that will be preselected when launching new instances.
- You can now download the details of your consumption in the .csv or .json formats. For more information, see [Getting Information About Your Resource Consumption](#).

API Documentation

August 12, 2019 (eu-west-2) / August 5, 2019 (us-west-1) / August 6, 2019 (us-east-2) / August 5, 2019 (cn-southeast-1)

- Flexible GPUs are now available. For more information, see the [Flexible GPUs FAQ](#).
- New VM types are available. For more information, see the [3DS OUTSCALE's Offering Refinements FAQ](#).
- Load balancers now support the UDP protocol.

Available Guides

User Guide

Provides detailed information about our products and features and how to use them.

This guide explains all the concepts and provides all the information you need to know to use our products. You can find information about how to use the 3DS OUTSCALE Cloud with our web interface Cockpit, and AWS CLI. For each feature, a link to the corresponding API method documentation is also provided.

For more information about the features available from Cockpit and how to access it, see [About Cockpit](#). For more information about how to install and configure AWS CLI for the 3DS OUTSCALE Cloud, see [Installing and Configuring AWS CLI](#).

API Documentation

English only

July 8, 2019 (eu-west-2) / July 1, 2019 (us-west 1) / July 2, 2019 (us-east-2) / July 1, 2019 (cn-southeast-1)

- Listener ports of load balancers now support all values between 1 and 65535, both included.
- The TLS 1.0 protocol is no longer supported on load balancers created or modified after this release.

June 10, 2019 (eu-west-2) / June 3, 2019 (us-west-1) / June 4, 2019 (us-east-2) / June 3, 2019 (cn-southeast-1)

- Tags are now supported for NAT gateways, VPC peering connections, VPC endpoints and export tasks.
- The `ModifyImageAttribute` method now supports the Description attribute.

Technical Guide
