

Getting Information About Your Account and Quotas

- EN
- FR

You can get information about attributes of your account, such as your account ID, login details and access keys. You can also get information about your resources and their associated quotas.

This procedure is available for Cockpit only. You can also use this feature through the API. For more information, see the corresponding API methods.

Related Pages

Hover over your name. A drop-down menu appears:

- To get information about your account, click **Personal information & Access keys** . A page with your personal information appears. The following attributes are listed:
 - Account ID
 - First name
 - Last name
 - Phone number
 - Mobile number
 - Email
 - Country
 - Zip code
 - Company
 - Job title
 - Password
 - Access keys

This page also enables you to modify your personal information and manage your access keys. For more information, see [Modifying Your Personal Information and Password](#) and [Managing Your Access Keys](#).

- To get information about your quotas, click **My limits** . A page with your resources and their associated quotas appears. The following resources are listed:

	Resources	Description
Compute	Instances	The maximum number of instances you can launch.
	Cores	The maximum number of vCores you can use for all your resources.
	Memory (GiB)	The maximum amount of RAM you can use for all your resources, in gibibytes.
	Flexible GPU	The maximum number of flexible GPUs (fGPUs) you can allocate to your account.
Storage	Number of volumes	The maximum number of volumes you can use for all your resources.
