			DirectLink

What's New?

- The **Marketplace** service is now available. For more information, see [About 3DS OUTSCALE's Marketplace](#).
- An [FAQ about the VPN feature](#) is now available.
- A new Region, **ap-northeast-1**, is available on the OUTSCALE Cloud. The **cn-southeast-1** Region has been closed. For more information, see [Regions, Endpoints and Availability Zones Reference](#).
- A page has been added regarding the End-of-life policy of 3DS OUTSCALE's products. For more information, see [End-of-Life Policy](#).
- You can now manage your account's access to APIs via access rules. For more information, see [About API Access Rules](#).
- You can now increase the size of a volume. For more information, see [Increasing the Size of a Volume](#).
- The **OUTSCALE Object Storage (OOS)** service is now available. The [About Object Storage](#) page has been updated and a [tutorial](#) has been added to help you use this new service.
